

Their Challenge

AA Munro's aim was to create a more ergonomic, light-filled, and acoustically balanced workspace that enhanced comfort, productivity, and professionalism.

Our Solution:

AA Munro is an independent Canadian insurance brokerage with office locations across Nova Scotia. The company offers a range of insurance products, including auto, home, and life insurance. AA Munro is committed to providing personalized insurance solutions tailored to individual needs.

AA Munro's Bedford office upgrade focused on enhancing functionality, ergonomics, and aesthetics. The project introduced sit-stand desks, improving workplace ergonomics by offering flexibility for employees who spend long hours at their desks. Glass paneling on workstations was incorporated to maintain an open, light-filled environment while also providing acoustic benefits. Taller workstation panels help minimize noise without obstructing natural light, and hanging sound-dampening panels add both visual interest and improved privacy. The result is a professional and inviting workspace that supports productivity and creates a welcoming environment for clients and industry professionals.

“Working with Shelley and the team was very positive! The ABI team is very responsive to questions, happy to help us stay in budget while achieving the function and vision we were looking for.”

Karen G. Ryan, Service Team Lead

Industry: Insurance

Workspace: Open-plan

Year founded: 1944

Key Considerations:

- Private, flexible & functional workspaces
- Multi-function offices
- Meeting rooms outfitted with AV solutions & cable management
